

## *December 2020 Virtual Immersion Q&A*

**Q1: Is there a way to get the information on the company in Texas for the antibody tests??**

A1: Par 3 Health Ventures, LLC. Kyle Hooper - khooper@par3health.com - (817)291-7405

**Q2: Who manages your website?**

A2: AesthetiCare has worked with a local digital company, Lifted Logic for the past 5 years. They did such an amazing job, we joined forces and started MINT Marketing (the baby of MINT and Lifted Logic). We can help you! Give us a call!

**Q3: What products do you use to pretreat Asian skin for Halo, and how many weeks prior? What settings would you recommend to use?**

A3: We use a product called The Perfect Bleaching Cream ([www.theperfectdermapeel.com](http://www.theperfectdermapeel.com)). It is 4% hydroquinone, licorice extract, kojic, arbutin and ascorbic acid. It retails for \$76 (\$38 wholesale). We prefer to pretreat for 30 days prior to treatment. Settings for Fitz IV - 1470 400u @10-15% and 2940 20u at 10% or less.

**Q4: What is the LED Device that you use for acne? Also, do you use ProNox for BBL?**

A4: We use the Lightwave system and LOVE it! Generally, we do not use pronox for BBL but would consider if the client was really having a hard time.

**Q5: What is the spray that was being used? The anti fungal spray?**

A5: We use Lasercyn Dermal Spray (hypochlorous acid) before and after treatment which is antifungal and antimicrobial. The spray used during the treatment is from Avene. It is their thermal spring water spray. It just feels good ;)

**Q6: Why only treat the scar and not the entire neck for a uniform treatment?**

A6: Of course you could treat the entire neck! Her concern was the scar but treating the entire neck would be even better!

**Q7: What numbing cream does everyone like to use?**

A7: We use a 23% lidocaine, 7% tetracaine. For details on the numbing cream we use, you can call Stark Pharmacy (913)345-3800
